

## AUTOMATIC LICENSE PLATE RECOGNITION KIOSK

---

Envera's ALPR Kiosk, or Automatic License Plate Recognition Kiosk, captures the license plate of guests using the visitor lane of a community entrance. If the visitor's license plate is associated with a registered and permitted visitor, the license plate will be recognized, and the gate will automatically open for the visitor. If the driver's license plate is not recognized, a licensed Virtual Guard will greet the visitor and allow or deny entry as necessary.

# ENVERA'S VIRTUAL GATE GUARD

# ALPR KIOSK

- Tracks vehicles allowed entry into the community
- Expedites wait times at an entrance
- Helps reduce stacking
- Easy, verified entry for repeat visitors
- Capture of license plate information using optical character recognition
